REINFORCED

SKIN CLOSURE STRIPS

ABOUT THE STRIPS

PRIMED's Reinforced Skin Closure Strips provide added strength with integrated filaments, making them ideal for primary wound closure or as an alternative to sutures and staples. They also offer support after suture or staple removal under minimal tension. Each strip is sterile, latex-free, and made with medical-grade adhesive for secure, reliable performance.

FEATURES & BENEFITS

Sterile & latex-free.

Comes in various widths and lengths to meet clinicians needs.

Reinforced with filaments to provide extra strength and durability.

NON-REINFORCED

SKIN CLOSURE STRIPS

ABOUT THE STRIPS

PRIMED's Non-reinforced Skin Closure Strips offer a lighter, more flexible option for wound closure, providing a subtle and less noticeable appearance. Ideal for low-tension applications, they can be used as an alternative to sutures or staples or to support healing after their removal. Each strip is sterile, latex-free, and made with gentle, medical-grade adhesive for secure yet comfortable wear.

FEATURES & BENEFITS

Sterile & latex-free.

Comes in various widths to meet clinicians needs.

Tan colour for a discreet, natural look on skin.

Non-reinforced design for gentle, low-tension wound closure.
